

Strategy details

Inception	2 June 2011
Min. initial investment	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.10%
Annualised volatility	10.77%

Annualised 3-year volatility data as at 31.05.24

Charges

Annual management charge*	0.30%
Ongoing charges figure	0.82%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a Bordier Risk Profile 5 and Defaqto Risk Rating 8 (Adventurous).

About the Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy.

Investment update

Asset returns were strong over May with both developed market equities and global bonds rising. After a weak April, the US equity market rebounded strongly as rate expectations fell. Uncertainty over the interest rate outlook continues to bring some volatility however market momentum remains positive on the back of a strong corporate earnings season and improving economic data. On the inflation front, data stemming from the US was mixed. While the potential timing of interest rate cuts has been pushed forward, some loosening of policy in the US is still expected this year. European markets also performed well in May as positive GDP growth was confirmed for Q1 and corporate earnings announcements surprised on the upside. Despite a recent modest tick up in inflation the European Central Bank continues to signal a potential rate cut in June. The UK market rose 2.5%, lagging the US and eurozone largely due to its 'value' bias and high exposure to energy stocks, which were impacted by a falling oil price. UK inflation fell to 2.3% and is expected to fall further still in the short term. We continue to see tailwinds, which should be supportive for financial markets in the coming months. As such, no changes were made over the month to the strategy's headline asset allocation, which remains at the top end of its allowable equity range. We expect further reductions in inflation towards central bank targets and a consequent easing of financial conditions as tight monetary policy is unwound. Evidence suggests that economic growth is recovering globally and this should be accompanied by growth in corporate earnings and improved profit margins. In the UK equity sector, TM Crux UK Special Situations was sold. The fund, being smaller in size in terms of assets under management, has experienced significant outflows and we felt it prudent to exit our investment to avoid the potential of any issues exiting the fund in the future. Proceeds have been reinvested into JOHCM UK Growth.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
Adventurous (98% eq.)	11.2%	10.3%	31.6%	83.9%
