

Strategy details

Inception	2 June 2011
Min. initial investment	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.08%
Annualised volatility	10.55%

Annualised 3-year volatility data as at 30.09.24

Charges

Annual management charge*	0.30%
Ongoing charges figure	0.75%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a Bordier Risk Profile 5 and Defaqto Risk Rating 8 (Adventurous).

About the Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy.

Investment update

Although equity markets saw a wide dispersion of returns in September, all key regions remain firmly in positive territory so far this year. Weaker employment and consumer confidence data drove the US Federal Reserve to announce the first interest rate cut since March 2020, which was welcomed by financial markets. The consensus view is for two further cuts this year followed by four more in 2025. The European Central Bank also cut rates for the second time in response to some disappointing economic data that dampened investor confidence somewhat. Short-term sentiment in the UK was also knocked by data showing that wage pressures remain firm and concerns around the potential impact of the upcoming budget. The strongest returns came from Asian markets, which were up over 7% in local currency terms. The key driver was the announcement of a huge stimulus package in China, which included cutting rates, releasing liquidity in the banking system, issuing the equivalent of c.\$285bn worth of bonds and providing further support to the ailing property sector. As would be expected, the more dovish sentiment benefitted fixed income assets with sovereign bond yields across all key regions falling (and values rising). Investment grade credit and higher yielding areas of fixed interest markets also produced strong returns. A backdrop of generally resilient global economic growth, moderating global inflation and reductions in interest rates should continue to be supportive for a wide range of asset classes for the rest of the year and into 2025. As such, we remain positive on the outlook for equities, with our exposure skewed to areas of relative economic strength (US and Asia). We also continue to see recovery and structural change potential in Japan and value opportunities in Europe and the UK. As a result, we currently see no need to alter our regional positioning. No changes were made over the month and the strategy remains at top end of its allowable equity range. Fixed interest markets are benefiting from reduced inflation and interest rates and our increased exposure and longer maturity profile have been working well. We have been gradually reducing our alternatives exposure in favour of fixed income however our market neutral 'absolute return' funds continue to deliver positive (absolute) returns regardless of market conditions.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
Adventurous (98% eq.)	14.0%	8.6%	27.9%	87.5%
