### Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

### Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 3 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

### About the Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service consists of five actively managed investment growth strategies (Risk Targeted 3-7). Each strategy has a different level of risk and expected return, and are rigorously mapped within the volatility boundaries assigned to specific Dynamic Planner risk profiles (RTM 3-7).

### Investment update

Although equity markets saw a wide dispersion of returns in September, all key regions remain firmly in positive territory so far this year. Weaker employment and consumer confidence data drove the US Federal Reserve to announce the first interest rate cut since March 2020, which was welcomed by financial markets. The European Central Bank also cut rates for the second time in response to some disappointing economic data that dampened investor confidence somewhat. Short-term sentiment in the UK was also knocked by data showing that wage pressures remain firm and concerns around the potential impact of the upcoming budget. The strongest returns came from Asian markets, which were driven by the announcement of a huge stimulus package in China. As would be expected, the more dovish sentiment benefitted fixed income assets with sovereign bond yields across all key regions falling (and values rising). Investment grade credit and higher yielding areas of fixed interest markets also produced strong returns. A backdrop of generally resilient global economic growth, moderating global inflation and reductions in interest rates should continue to be supportive for a wide range of asset classes for the rest of the year and into 2025. As such, we remain positive on the outlook for equities, with our exposure skewed to areas of relative economic strength (US and Asia). We also continue to see recovery and structural change potential in Japan and value opportunities in Europe and the UK. As a result, no changes were made over the month and the strategy remains at the upper end of its Dynamic Planner risk profile. Fixed interest markets are benefiting from reduced inflation and interest rates and our increased exposure and longer maturity profile have been working well. We have been gradually reducing our alternatives exposure in favour of fixed income however our market neutral 'absolute return' funds continue to deliver positive (absolute) returns regardless of market conditions.
